Are you finishing your degree? Hope to get excellent results? Do you want to develop mathematics to solve challenging, real-world problems which can make a difference to business and society? If so then why not consider applying to the STOR-i Centre for Doctoral Training.

For October 2015 entry we have fully-funded studentships available for UK and EU nationals which include tuition and a tax-free enhanced maintenance grant of up to £15,500 (subject to fee status, see website for details: <http://www.stor-i.lancs.ac.uk/apply/funding>). To find out more, please see below.

### About STOR-i

STOR-i, the EPSRC Centre for Doctoral Training in Statistics and Operational Research in partnership with Industry, is a pioneering 4 year PhD programme established in 2010. Using industrial challenge as the catalyst for mathematical innovation the Centre will develop future international research leaders. Industrial partners include AstraZeneca, BT, IBM and Shell.

We offer a unique style of PhD training, which provides an opportunity to:

- be part of an exciting new group of researchers;
- co-operate and interact with like-minded peers;
- work directly with leading industry partners;
- open up real potential for rapid career progression;
- make a real scientific and industrial impact with your research.

To find out more please visit <http://www.stor-i.lancaster.ac.uk/>.

STOR-i is funded by the EPSRC in partnership with Lancaster University and a number of leading companies.
