Dear Colleagues,

We are pleased to invite you to participate in the:

“Workshop on Flexible Models for Longitudinal and Survival Data with Applications in Biostatistics (27th-29th July, 2015)”

website: <http://www2.warwick.ac.uk/fac/sci/statistics/crism/workshops/fmlsjd?>

This workshop is aiming to bring together statisticians as well as practitioners working in the areas of Longitudinal models, Survival models, and Joint models, with a special focus on the impact of the use of flexible distributional assumptions. The workshop is divided into three parts:

Longitudinal Modelling (27th July), Survival Modelling (28th July), and Joint Modelling (29th July). The event is funded by the EPSRC (Engineering and Physical Sciences Research Council) and organised through CRiSM (Centre for Research in Statistical Methodology, University of Warwick). We will be offering 10 bursaries for young researchers.

Best regards,

Organisers:

Mark F. J. Steel,

Francisco Javier Rubio,

Department of Statistics,

University of Warwick.
