The Third International Workshop “Applied Methods of Statistical Analysis,– Nonparametric Approach” (AMSA-2015)”, organized by the Novosibirsk State Technical University, will be held in Novosibirsk, Russia, on 14-19 Sep, 2015.

Please refer to the following link for detailed information: <http://amsa.conf.nstu.ru/amsa2015/>

The workshop mostly focuses on methods of traditional statistical modelling, however, there is also a strong emphasis on models’ computational and simulation aspects, which opens possibilities for a Bayesian approach.

One of the special sessions will be on “Real-world Applications of Bayesian Models”. The aim of the session is to present practical applications of Bayesian modelling methodology in solving real-world problems.

If interested in presenting at the Bayesian session, you are kindly invited to send an abstract of the talk to the address milovan.krnjajic@nuigalway.ie.

Please send your email by 15-Feb-2015.

Kind regards,

Milovan Krnjaji?

Stokes Lecturer of Statistics

School of Mathematics, Statistics & Applied Mathematics National University of Ireland, Galway
Galway, IRELAND
