Distribution Classes Estimation Inference

Rhodes, Greece, 23-29 September 2015

<http://10times.com/distribution-theory>

Dear colleague, similarly to what happened in the past years, we are planning to organize the ‘5th Symposium on Distribution Theory, Estimation and Inference’ within ICNAAM 2015 (Rhodes, Greece, 23-29 September 2015, <http://www.icnaam.org/>) and we would like to be able to have you as a participant in the above Session. You can take a look at the Symposium/Session web-site at <http://10times.com/distribution-theory> .

This year we will have the opportunity to submit the full paper to a special issue of the Journal REVSTAT (indexed in Web-of-Science, with an Impact Factor of 0.679). This special issue will cover exactly the topic “Distribution Theory, Estimation and Inference” and will be published in March 2017.

The papers submitted to this special issue will be subjected to the usual refereeing process of the Journal and the special issue will also be open to other authors. The deadline for submissions to the special issue of REVSTAT is February 29, 2016 and the manuscripts should be sent to the e-mail address cmac@fct.unl.pt .

We would like to be able to have you among the participants of our Session/Symposium.

With our best regards

Carlos A. Coelho (Faculdade de Ciências e Tecnologia, Universidade Nova de Lisboa)

Filipe J. Marques (Faculdade de Ciências e Tecnologia, Universidade Nova de Lisboa)

Wolf-Dieter Richter (Universität Rostock, Institut für Mathematik)
