Dear Researchers,

We are really excited to announce the coming **STATegra Summer School on Omics Data Integration**.

In the summer school we are inviting PhD students and Post-docs to join for:

- Lectures and Hands-on on state-of-the-art high-throughput omic data types.
- Lectures and Hands-on for data integration and visualisation methodologies.
- Seminars on selected topics such as meta-analysis, single-cell RNA-seq and reverse engineering.

Participants will also work in groups to complete a small research project to be presented by the end of the Summer School.

The summer school will be a highly intensive event running for 5 days, see the program at: <http://stategrasummerschool.com/programme/>

See details and application process at: <http://stategrasummerschool.com>

We would also ask you kindly to share this information with any colleague you may think would be interested on it.

Looking forward to meet you there,

Best regards

David Gomez-Cabrero and Raffaella Giugliano on behalf of the Organization Committee.

Post: for more information on STATegra see also: stategra.eu

Post: we are also organizing a conference on Omics Data Integration Conference for the week after the Summer School:
