Gday

Are you looking for a postdoc or more senior fellowship in Data Science, Computational Modelling and Simulation Science? Are you up for an adventure in Australia, located at one of the country's oldest and largest group of Bayesian statisticians? QUT also has a unique blend of computational and applied mathematicians, statisticians, and machine learners. It is also a major node of the Australian Centre of Excellence in Maths and Stats Frontiers which spans four states and includes around 50 researchers.

If you are interested, please consider applying for a prestigious QUT Vice-Chancellor's Fellowship. Email ISBA member Kerrie Mengersen ([k.mengersen@qut.edu.au](mailto:k.mengersen@qut.edu.au)) or QUT Associate Dean for Research Bronwyn Harch ([bronwyn.harch@qut.edu.au](mailto:bronwyn.harch@qut.edu.au), a world-class statistician as well as research director) and see the following sites for more details.

<http://www2.qut.edu.au/jobs/ecard/docs/VCRFGuidelines2015.pdf>

Note that applications close soon. Come and join us!

Kerrie Mengersen

Professor, Statistics

QUT Brisbane Australia
