Assistant/Associate Professor of Biostatistics in Big Data Harvard T.H. Chan School of Public Health

The Department of Biostatistics at the Harvard T.H. Chan School of Public Health (SPH) seeks outstanding candidates for one tenure-track position at the assistant or associate professor level in the area of statistical and computational science for big data in health science.

For this position, we seek candidates with a strong background in biostatistics, data science, computer science, or related fields, with the potential to become leaders in the development and application of statistical and computational methods for big data in health science. We seek candidates who are enthusiastic for teaching, training, and mentorship through the graduate program. Responsibilities will include methodological and collaborative research, teaching, and supervision of graduate students.

Candidates are required to have a doctorate or terminal degree in biostatistics, statistics, computer science, machine learning, or allied fields by the time the appointment begins.

Please apply to: <https://academicpositions.harvard.edu/postings/6469>

For questions, please contact:

Chair, Search Committee for Assistant/Associate Professor of Big Data c/o Vickie Beaulieu Department of Biostatistics Harvard T.H. Chan School of Public Health

Email: biostatjrsearch@hsph.harvard.edu

The Department of Biostatistics at the Harvard T.H. Chan School of Public Health (SPH) also has 1) two tenure track positions at the assistant or associate professor level in the areas of statistical genetics/genomics and computational biology, and 2) a non-tenure track lecturer or senior lecturer position in big data. For more details on these positions please visit <http://www.hsph.harvard.edu/searches/>.

Harvard University seeks to find, develop, promote, and retain the world's best scholars and is an Affirmative Action/Equal Opportunity Employer.

Applications from women and minority candidates are strongly encouraged.

Information on resources for career development and work/life balance at Harvard T.H. Chan SPH can be found at:

**Assistant/Associate Professors of Statistical Genetics/Genomics and Computational Biology
Harvard T.H. Chan School of Public Health**

The Department of Biostatistics at the Harvard T.H. Chan School of Public Health (SPH) seeks outstanding candidates for two tenure-track positions at the assistant or associate professor level in the areas of statistical genetics/genomics and computational biology.

We seek candidates with strong backgrounds in biostatistics, statistical genetics and genomics, computational biology, bioinformatics, systems biology, computer science, or related fields, with the potential to become leaders in the development and application of statistical and computational methods for analysis of genetic and genomic data. Candidates should also be enthusiastic for teaching, training, and mentorship through the graduate program. Responsibilities will include methodological and collaborative research, teaching, and supervision of graduate students.

Candidates are required to have a doctorate or terminal degree in biostatistics, statistics, computational biology, computer science, or allied fields by the time the appointment begins.

Please apply to: <https://academicpositions.harvard.edu/postings/5755>

Lecturer/Senior Lecturer of Health Data Science Harvard T.H. Chan School of Public Health

Three job postings - 10-18-2015

por webadmin - Sociedad Española de Biometría - <http://www.biometricsociety.net>

The Department of Biostatistics at the Harvard T.H. Chan School of Public Health (SPH) seeks outstanding candidates for a non-tenure-track lecturer or senior lecturer position in big data.

We seek candidates who are leading applied statistical and computational scientists in big data in health science. The lecturer/senior lecturer will play a leadership role in the new Master of Science program in health data science, and will help advance training and collaborative research in big health data. Candidates should have demonstrated skill and background in computing, machine learning, and statistical analysis of big data, preferably with applications in health science research, as well as enthusiasm for teaching, training, and mentorship through the graduate program.

Candidates are required to have a doctorate or terminal degree in biostatistics, statistics, computational biology, computer science, or allied fields by the time the appointment begins.

Please apply to: <https://academicpositions.harvard.edu/postings/6467>
