The most recent research institute created at the USI, the InterDisciplinary Institute of Data Science, IDIDS, (www.idids.usi.ch) has an immediate opening for a post-doctoral researcher in a three-year project supported by the Swiss National Science Foundation (SNF).

The project is co-directed by Professor Antonietta Mira (co-director of the IDIDS, USI) and Professor Jukka-Pekka Onnela (Department of Biostatistics, Harvard University).

Successful candidates will have recently completed a PhD degree in Statistics, Applied Mathematics, Physics or Computer Science and have a background in statistical network science.

Interested applicants should send their CV, cover letter, two publications and contact information for three references to idids@usi.ch. Please include "ABC Methods in Network Science" in the subject.

The position is tenable immediately and open until filled.

Salary is internationally competitive.
