Postdoctoral Research Fellow in Digital Medicine

DATAI is seeking applications from motivated young researchers with an excellent track record in Bioinformatics and Data Science to fill one **Postdoctoral Research Fellow in Digital Medicine position**. The position is funded for three years through the PORTRAIT project, a [European ERA PerMed grant](#) in the Prevention in Personalized Medicine program (ERA Net Grant 779282). The PORTRAIT project aims to develop a multiomic stratification and non-invasive tool for early recognition of triple negative and Her2+ breast cancer patients' responders to neoadjuvant therapy.

Job and Application Process

- The position is based at UN Pamplona's central campus. A hybrid virtual and in-person arrangement could be discussed.
- Review of applications is ongoing and will continue until the position is filled.
- Three years of contract supported by the PORTRAIT ERA PerMed project.
- Opportunity to join a fast-growing research center to work on a socially impactful topic.
