

## CoDaWork2024

por webadmin - viernes, diciembre 29, 2023

<http://www.biometricsociety.net/2023/12/29/codawork2024/>

CoDaWork2024 is the **10th edition of the international Workshop on Compositional Data Analysis**. We keep the CoDaWork revolving around the methods and their applications in varied scientific fields. It is intended to be an open forum for the discussion of any methodological and practical aspects related to the analysis, modelling and interpretation of compositional data.

Specialist researchers, postgraduate students, practitioners, anyone with a general interest in the field, are all encouraged to contribute with their ideas, developments, issues, experiences, and results. It is a great opportunity for networking and meeting other researchers and practitioners in our community, in a genuinely friendly and informal environment.

As traditionally, an **introductory course on compositional data analysis** will be offered on the first day.

Important dates:

**Extended abstract due: January 19, 2024**

**Notice of abstract acceptance: February 16, 2024**

**Early registration due and extended abstract due: April 17, 2024**

**Introductory course: June 3, 2024**

**Density Data Analysis – CoDaWork’24 satellite meeting: June 3, 2024**

**CoDaWork2024: June 4-7, 2024**
