

# ScoVa16

*ScoVa16*, the first Scotland and Valencia workshop on Bayesian Statistics, is a two-day workshop which brings together Biomathematics and Statistics Scotland (*BioSS*) and Valencia Bayesian Research Group (*VaBaR*). Its purpose is to share research ideas and explore collaboration opportunities in the area of Bayesian Statistics, with special attention to new methodologies and applications to Agriculture, the Environment, Food and Health.

*ScoVa16* will be held at the Faculty of Mathematics of the Universitat de València, Burjassot, València, on January 28th and 29th, 2016.

Invited speakers are:

- **Mark Bewer** (*BioSS*)
- **Adam Butler** (*BioSS*)
- **Kokouvi Gamado** (*BioSS*)
- **Giles Innocent** (*BioSS*)
- **Glenn Marion** (*BioSS*)
- **Carmen Armero** (*VaBaR*)
- **María-Eugenia Castellanos** (*VaBaR*)
- **David Conesa** (*VaBaR*)
- **Gonzalo García Donato** (*VaBaR*)
- **Virgilio Gómez-Rubio** (*VaBaR*)

# SCOVAT6

Friday, January 29

Thursday, January 28

Scientific committee

Scientific committee	9:45 - 10:00 am	Welcome
Glen Marion	10:00 - 10:30 am	Climatic envelopes for species distribution models
Mak Breweyer (BioSS)	10:30 - 11:05 am	Climatic envelopes for species distribution models
Glen Marion	11:05 - 11:35 am	Bayesian methods for Model Selection and related problems
Gonzalo García-Donato	11:45 - 12:15 am	Bayesian applications in applied ecology
Adam Butler	12:25 - 12:55 am	David Conesa
Mark Breweyer (BioSS)	12:25 - 12:55 am	Species distribution modelling
Carmen Armesto (Vabar)	11:45 - 12:15 am	Bayesian joint models for longitudinal and survival data
Maria-Eugenia Castellanos	11:45 - 12:15 am	An introduction to Approximate Bayesian Computation methods
Carmen Armesto (Vabar)	11:05 - 11:35 am	Bayesian methods for longitudinal and survival data
Maria-Eugenia Castellanos (Vabar)	10:30 - 11:05 am	Coffee Break
Carmen Armesto (Vabar)	10:00 - 10:30 am	Climate envelopes for species distribution models
Glen Marion	10:00 - 10:30 am	Climatic envelopes for species distribution models
Mak Breweyer (BioSS)	10:30 - 11:05 am	Climatic envelopes for species distribution models
Glen Marion (BioSS)	11:05 - 11:35 am	Bayesian joint models for longitudinal and survival data
Maria-Eugenia Castellanos (Vabar)	11:45 - 12:15 am	Bayesian methods for longitudinal and survival data
Carmen Armesto (Vabar)	11:05 - 11:35 am	Bayesian joint models for longitudinal and survival data
Mark Breweyer (BioSS)	11:45 - 12:15 am	Bayesian joint models for longitudinal and survival data
Damilo Alvares (Vabar)	12:25 - 12:55 am	An introduction to Approximate Bayesian Computation
Carmen Armesto (Vabar)	12:25 - 12:55 am	Bayesian joint models for longitudinal and survival data
David Conesa (Vabar)	12:25 - 12:55 am	Bayesian joint models for longitudinal and survival data
Elena Lazaro (Vabar)	12:25 - 12:55 am	Kokouvi Gamado
Francisco Santonja (Vabar)	12:25 - 12:55 am	Inference problems in livestock diseases
Blanca Sarizo (Vabar)	13:05 - 13:30 pm	Lunch
Venue:	13:30 - 16:45 pm	Poster Session
Talks in the Saló de Graus, and posters in Aula 1.6.	16:45 - 17:15 pm	Coffee Break
Faculty of Mathematics of the Universitat de València.	17:15 - 19:00 pm	Management brainstrom
Analysts of risk factors using life history - a partial inference	16:40 - 16:10 pm	Virgilio Gómez-Rubio
Extending the integrated Laplace Approximation	16:20 - 16:50 pm	Coffee Break
16:50 - 19:00 pm	Scientific brainstrom	

15:00 - 15:30 pm	Giles Imhoff
15:30 - 15:00 pm	Lunch
15:30 - 16:45 pm	Poster Session
16:40 - 16:10 pm	Virgilio Gómez-Rubio
16:20 - 16:50 pm	Coffee Break
16:50 - 19:00 pm	Extending the integrated Laplace Approximation
